

For Boots That Work As Hard As You Do

PORON[®] Cushioning technology keeps up the pace with tough, durable, high performance materials

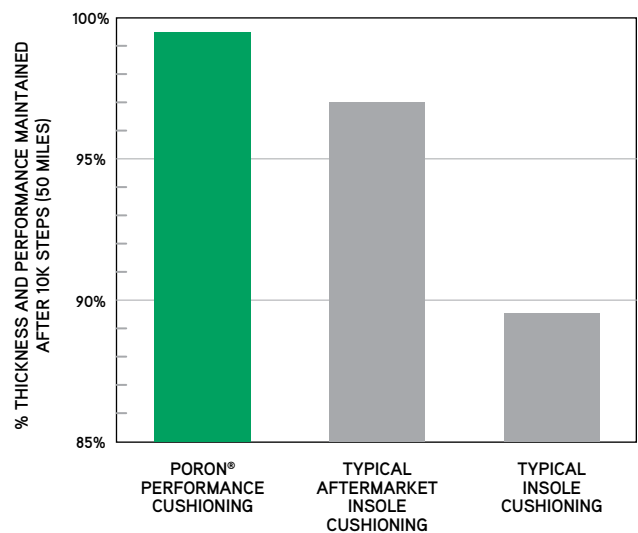

Lasting cushioning comfort that goes the distance

PORON[®] Cushioning Materials bring long-lasting comfort and performance in a durable material that withstands even the toughest daily wear. Ideal for use in a variety of work and duty shoe applications, PORON Cushioning Technology is available in multiple formulations to suit your specific needs while maintaining the standard PORON benefits that top brands have come to rely on:

- Reliable PORON Cushioning will never break down, unlike other cushioning and protective foams that collapse with wear and time.
- Lightweight and breathable to keep you cool and dry.
- Infused with Microban[®] antimicrobial protection to help prevent stain and odor causing bacteria, mold and mildew.
- For more than 40 years, Rogers has been a trusted U.S. manufacturer and supplier of PORON Cushioning while maintaining global availability to leading brands throughout the footwear and protective apparel industries.

PORON[®] CUSHIONING GIVES YOU UNBEATABLE COMFORT AND PERFORMANCE USE AFTER USE

Additional PORON Performance variations may be available upon special order. Rogers recommends textile or leather covering for additional comfort and wear strength. Please contact your Rogers Customer Service Representative for more details.

Engineered For Your Specific Design Application

PORON® SLOW REBOUND CUSHIONING

Contouring, memory foam-like material offers a unique custom fit during each use.

1 8 - SOFT 2 - VERY SOFT

PORON® XRD™ TECHNOLOGY

The best wearable multiple impact protection material, that's comfortable, lightweight, flexible and breathable.

3 4

PORON® XRD™ M-GUARD

Ready-to-use standard shapes designed to help you pass in-product ASTM F2413 application testing.
